

HUGE ROCKET RANGE TO BE SET UP IN AUSTRALIA TO STRETCH ACROSS CONTINENT

CANBERRA.—The government has accepted British proposals for the establishment of a rocket range that will stretch some 1,200 miles across the Australian continent and eventually reach from the Indian ocean to the Pacific.

An announcement, from confidential sources, was made last night when Lt.-Col. J. P. Bowles came to Ottawa with a "rocket mission" and several prospective foreign buyers in a range.

The Canberra announcement said that Col. Bowles will return soon with the groundwork for the \$20,000,000 project to start out with rocket firing at limited distances and proceed to experiments with guided missile projects.

The first step will be the setting up of a 300-mile-long range, but the final range some 120 miles wide will extend northeast from the fringe of the desert lands in the south-western Australia across the wide sweep down to the northwest coast at Port Hedland, in Western Australia, and then northeast to the Indian Ocean.

This site was chosen last Easter by Col. Bowles when he visited several days in aerial reconnaissance of the surrounding country, which contains a couple of dozen sheep stations of an average of about 1,200 square miles.

The project is to be assembled and maintained at Ballarat, in Victoria, about 100 miles from Melbourne. The plant near Adelaide, are expected to be built in the direction of the coast and fly over the sandy wastes into the desert where people would not wanderers who travel in the territory are not permitted protection by the government.

Up to 500 British and Australian soldiers and workers will be employed at the range and the local township will be developed to accommodate them. The munitions which will be used are the most largest in Australia. It was started in 1945 and cost nearly \$20,000,000.

BIRTH RATE DECLINE

Chief Justice McRae Says Thirty-
One Per Cent Of Homes

TORONTO.—Decrease in the Canadian birthrate in the past year has been "an alarming trend," Chief Justice McRae of the Ontario Supreme Court said in a statement after a meeting of the Toronto Council of the United Nations.

Thirty-one per cent. of all homes were childless and there was a tendency to reduce family size, he said. President of the royal commission on Canadian birthrate, Chief Justice McRae said the report of the committee and the Canadian family is facing a very serious problem.

Of 558 parents 15 years old or under, an average of 17 children to each family. Twenty-three per cent. of families in the Dominion had no children, while only 17 per cent. had more than three. The provision of the Quebec had the greatest family with an average of 2.9 children.

Quebec was next with 30 children, followed with 2.5 and Ontario with 2.3. The average for the Dominion was 2.3.

CANADA'S SHARE

Liquidation Of German External
Assets Will Give Dominion
About \$15,000,000

OTTAWA.—Canada's share in the approximately \$150,000,000 worth of German external assets to be liquidated in neutral countries probably will total approximately \$15,000,000, government sources estimated.

This will be in addition to the Canadian share of Germany's internal assets of the internal assets of the Dominion, expected to reach 10,000 tons of German shipping and 15 per cent. of Germany's heavy industry.

A Washington dispatch estimated the liquidation of German assets in neutral countries probably would yield approximately \$15,000,000 to 45 million dollars.

GROWN FOR EXPORT

R.C. Forestry Officers Say Christmas
Trees Are Profitable This Year

VICTORIA.—British Columbia's Christmas tree harvest this year produced nearly 2,000,000 trees for export, according to R.C. Forestry officers, and is expected to reach a new record this year.

Production is chiefly for export, going to all sections of the Dominion and first peaked at 1,000,000 marks in 1937.

WILL NOT PARTICIPATE

NEW DELHI.—The secretary of the Indian National Congress, Mr. J. B. Kripalani, announced that the Congress would not participate in the new constitution-making assembly which convenes Dec. 9. The president announced in the series of crisis marking the year to achieve independence.

NOT AFFECTED

OTTAWA.—A CBC spokesman said that the Canadian Broadcasting Corporation is not affected by the new Servis Act on direct broadcasts from the United States. The Prime Minister says the CBC has never maintained a radio connection in the United States.

BLOOD PLASMA CONTAINERS

BATLE, Pa.—The containers of blood plasma, carrying simple instructions, will go on the shelves of the Red Cross before long, according to Dr. W. H. Miller of the Johns Hopkins Hospital's surgery staff.

RATION UNCHANGED

Better Situation Will Be Reviewed
After Second End Of Year

OTTAWA.—The government has decided that the present individual rationing system will be maintained until a person weekly can be made to meet the end of the year. The rationing system will be reviewed after the year-end.

The supply position beyond that date, however, still is too obscure to make any definite statement. A statement will be necessary and the latter date is a problem which will be reviewed again as the year-end approaches.

Authoritative sources reported that the supply position was running close to the margin where a reduction would be essential but it was expected that the country would reach the new year without going to the extreme of rationing. The ration was slackened a few cents.

For the improved situation at the end of the year, the individual ration of six ounces is a two per cent increase from the 1944-45 year.

The only place where Canada could borrow enough wheat to meet her needs would be New Zealand and it was brought out during the cabinet meeting that New Zealand wheat is only at the expense of British wheat.

It was pointed out that New Zealand wheat is only at the expense of British wheat. It was pointed out that New Zealand wheat is only at the expense of British wheat.

DO THEY FORGET THE WOMEN?

At the British Trade Union Congress, held recently at Brighton, England, the delegates demanded that the Labor government institute legislation to compel industry to adopt the 40 hour week.

To this demand, the govern-

ment it would not accede, claiming that it is impossible since it would decrease production. The view of the cabinet ministers, in spite of Trades Union disapproval, was that a weekly output of 47 hours was still necessary.

It may be thought that this has little to do with Canada. Nevertheless, it is a useful illustration of the general trend of labor policy. Only a few weeks ago, the Calgary Trades and

favoring work stoppage in all unions to enforce the 40-hour week. Indeed, the chairman pointed out, the "ultimate target of labor is a 90 hour week, in order to provide employment."

It is quite possible that in the not too distant future, these objectives desired by labor will come to realization. All signs of the times reveal that in this modern world, interlocking in many directions, labor union

As a plain matter of fact, labor holds one of the three keys vital to national progress.

Granted all this, there still remains an interesting speculation. Where does the wife of the union member come out in this new dispensation? The average married woman could be a member of several unions

WHAT ARE THE POSSIBILITIES

made by the writer of the article on war (a prominent war correspondent), who gave them as the "conclusions that have crystallized the minds of qualified observers. Some of these are: (1) Talk about Canada being the battlefield of world war III is loose talk. Europe still has the dubious distinction of being the likeliest locale of war. (2) A land invasion over the Arctic ice is most unlikely. (3) Canada would certainly be attacked by air, with the object of terrifying the civilian population and diverting our attention away from the main drive, which would be bigger and more valuable targets (perhaps in Europe and the Mediterranean area). (4) That such diversionary attacks

100% defence of Canada, and this permit an enemy to win its large share of the Canadian market.

All these conclusions are debated, but the strongest arguments are about the last "conclusion". Certainly there is no evidence to justify the claim that we have provoked two wars that they are able to win and sacrifice for the common good. Of the other "conclusions" it is difficult to say. I think we should agree that all Canadians must unite and work together now if Canada is to remain secure.

**MORE AND MORE FOR LESS
AND LESS**

There was once a time when we thought that freedom was all we needed for democracy. Then we discovered that we also needed education. And then freedom, plus an education, plus some pretty stiff anti-trust laws. Today, in England they've decided they also need nationalization of the economy. What can we do next to make democracy workable and still keep the economy free?

The truth is that, with freedom more and more people tend to be

to take responsibility for their actions. Democracy can't work. What we need is people willing to take more and more responsibility for their actions. And try. And this willingness is something that education, love and humanism can't teach.

Only three things reward this willingness and fan it into anything like eagerness. The first is the promise of reward in money, power or position. The third is love of God. The second is the promise of reward in the knowledge that other men still volunteer to take responsibility for it. But we don't want to reward people to make them do it. We want them to want to do it.

Pay men a high enough salary or give them enough power and position and they'll take responsibility. But bribing men to be responsible can't work.

There seems to be but the third alternative. If we want to keep a nation and a world free from the rule of men, we must find men again that love for something bigger than themselves. Something which makes them want to take responsibility for their fellows and their country when there is neither threat of danger nor reward.

CROP TESTING RESULTS
 Director "The Crop Testing Plant"

"CROP TESTING PLANT" 1946
WHEAT RESULTS

The "Crop Testing Plant" has completed an analysis of several thousand samples of wheat, of which, handed in for test, are as true to variety, each sample representing a field of wheat produced in 1946.

Of the total number of "B's" graded "A" this year, was 52%, compared with 47% in 1945, and 45% in 1944. The number of "B's," which means that the crop was beginning to be somewhat impure this year, was 29%; compared with 24% in 1945, and 22% in 1944. The number of "C's" and "Mixtures" which are very bad—was 28%; compared with 29% in 1945, and 33% in 1944.

10:00 Classics For Today.
10:30 Vesper Hour.
11:00 CBC News.

(Continued from previous column).
in 1944.

It will be observed that there is once again an improvement in true-ness-to-variety of the crops, as shown by the increase in "A's" and the decrease in "C's" and "Mixtures". As long, however, as 28% still grade "C's" and "Mixtures", there is certainly room for improvement. 4.6% of the samples tested

All farmers who had samples in for test, have been notified of the results. Those with "C's" and "Mixtures" have been advised to purchase better seed, Registered or Certified if possible. Last year 62% of such farmers did actually change their seed.

A.M.A. RAPS SCHEME TO INSTALL METERS

Opposition to increasing the tax burden on motorists has been expressed by the Alberta Motor Association, in connection with the present move to install parking meters in some cities in the province.

of off street parking spaces in available vacant lots, might prove the solution.

To install meters would have the effect of placing a greater tax burden on motorists, which would be unwarranted in the circumstances, it is claimed.

Furthermore, some of the larger Canadian cities, notably Toronto

The A.M.A. suggests that enforcement of parking laws and provisions
